

The screenshot displays the Bentley ProjectWise software interface. The main window shows the 'AutomaticWeldOperation_06' dialog box, which is a configuration window for weld operations. The 'Properties' panel on the right is open, showing the 'General' tab. The 'Name' field is set to 'AutomaticWeldOperation_06', and the 'Type' is 'Filter'. The 'Caption' field is 'Value-Operation'. The 'UpdateRate' is set to '300 ms'. The 'ValueAssembly' section is highlighted with a green box, showing a table with the following data:

Name	Alias For	Data Type	Description	Category
ValueController	BentleyAA_WD1_06001:ValueOperation	ValueTagButtonOperation		ValueAssembly

The 'ValueAssembly' table is located in the 'Properties' panel, under the 'ValueAssembly' section. It lists the assembly name and its location.
